

## Floor Rising Projector Screens

The Floor Rising portable projection screen is the perfect companion for business presentations, trade shows, hospitality, a simple home theater or any portable application! Less affordable than a traditional Tripod screen, the Floor Rising screen does however have a few more benefits – easier to carry, easier to setup and easier to retract. Easy, Easy, Easy!

### Design and Construction

Easily transportable and free-standing, the lightweight floor rising screen uses a pneumatic telescoping pull up mechanism that lifts the screen from the casing. Once finished projecting, the screen retracts just as easily, into its rugged yet lightweight aluminum case. The Floor Rising projector screen also features a built-in keystone eliminator, which allows the screen to tilt forward in multiple increments, in order to compensate for angled tabletop projection setups.

The Floor Rising projector screen utilizes a dual point scissor structure for the pneumatic telescoping pull up mechanism, for a stronger and more durable system. The sleek black aluminum case features an ergonomic carrying handle and folding feet to add stability to the projector screen when it's open. A height adjustable bottom black border is also added to raise the screen further from the ground, to normal viewing height.

### **Key Features**

- Floor Rising projector screens range from 60" to 100" diagonal sizes
- Easily transportable and free-standing, with quick open operation for ultimate convenience and portability
- Heavy-duty, yet lightweight black aluminum case with folding feet to add additional stability
- Air pressure spring and unique extension structure, allow screen stop at any desired level
- Height adjustable 41" bottom black border to raise the screen further from the ground
- Perfect for 4K Ultra HD and HD Resolutions
- Easy to carry and store, with quiet and smooth operation
- Height adjustable bottom black border to raise the screen further from the ground
- Available in HDTV (16:9) and NTSC Video (4:3) aspect ratios
- Matte white projection screen fabric with black backing, 1.1 gain and 110° viewing angle
- 1 year warranty

## Matte White Fabric

### **Viewing Angle: 110° / Gain: 1.1**

Matte White – The most versatile screen fabric surface and the premier choice when ambient light is controllable. The Matte White projector screen fabric evenly distributes light over a wide viewing area, while colors remain bright and life-like, with no shifts in hue or contrast. The 120° viewing angle allows for a very wide audience seating arrangement. With an even Gain of 1.0, this projector screen fabric allows for no loss of brightness from the projection source, as long as ambient light is controlled. A black backing to the fabric is also added to impede any light penetration from behind the projected surface.

The matte white screen surface can be easily and safely cleaned with mild soap and water. Do not use any other stronger chemical cleaners, as this may negatively affect the projection surface. The fabric surface is also flame retardant and mildew resistant.

## Specifications and Dimensions

Model Number	Diagonal	View Width	View Height	Case Size (LxWxH)	Package Size (LxWxH) & Weight	Case Color	Aspect Ratio	Screen Material
ATS-FR60H	60	48	36	60 x 4.6 x 3.8	63 x 6.5 x 5.8 – 22lbs	Black	16:9 HDTV	Matte White
