

## MicroFlex Low Profile DVI-D Cables

These are easily the most flexible DVI cables on the market today. Their low profile design and un-heard of flexibility make them perfect for use in surface access boxes, equipment racks and other tight spaces. The pro grade construction consists of a smaller 30 awg tinned copper construction for superior digital image quality and speeds up to 10.2 Gbps. Premium shielding ensures proper rejection of EM and RF interference. This versatile cable supports resolutions of up to 1900x 1200 @ 60 Hz and 1080p. Gold plated contacts and our famous Lifetime Warranty come standard.
