

1	Get UART BAUDRATE	<p style="text-align: center;">Syntax</p> <p>Command: GET UART_B [CR/LF]</p> <p>Return: UART_B [CR/LF]</p> <p>Parameter:</p> <p>Description: Get UART BAUDRATE,default value is 115200.</p>	<p style="text-align: center;">Example</p> <p>Command: GET UART_B [CR/LF]</p> <p>Return: UART_B 9600 [CR/LF]</p> <p>Description: Get UART baudrate 9600</p>
2	Set UART BAUDRATE	<p style="text-align: center;">Syntax</p> <p>Command: SET UART_B <i>prm</i> [CR/LF]</p> <p>Return: UART_B <i>prm</i> [CR/LF]</p> <p>Parameter: <i>prm</i> = {9600,19200,38400,57600,115200}</p> <p>Description: Set UART BAUDRATE,default value is 115200.</p>	<p style="text-align: center;">Example</p> <p>Command: SET UART_B 9600 [CR/LF]</p> <p>Return: UART_B 9600 [CR/LF]</p> <p>Description: Set UART baudrate 9600</p>
3	Get UART ENDCHAR	<p style="text-align: center;">Syntax</p> <p>Command: GET UART_E [CR/LF]</p> <p>Return: UART_E <i>prm</i> [CR/LF]</p> <p>Parameter: <i>prm</i> = {null,cr,lf,crlf} cr: carriage return, ascii code is 0x0D. lf: line feed, ascii code is 0x0A.</p> <p>Description: Get UART ENDCHAR,default value is crlf.</p>	<p style="text-align: center;">Example</p> <p>Command: GET UART_E [CR/LF]</p> <p>Return: UART_E <i>cr</i> [CR/LF]</p> <p>Description: UART end Char is cr</p>
4	Set UART ENDCHAR	<p style="text-align: center;">Syntax</p> <p>Command: SET UART_E <i>prm</i> [CR/LF]</p> <p>Return: UART_E <i>prm</i> [CR/LF]</p> <p>Parameter: <i>prm</i> = {null,cr,lf,crlf} cr: carriage return, ascii code is 0x0D. lf: line feed, ascii code is 0x0A.</p> <p>Description: Set UART ENDCHAR,default value is crlf.</p>	<p style="text-align: center;">Example</p> <p>Command: SET UART_E <i>cr</i> [CR/LF]</p> <p>Return: UART_E <i>cr</i> [CR/LF]</p> <p>Description: set UART end Char is cr</p>

5	character uart command edit	<p style="text-align: center;">Syntax</p> <p>Command: SET UART_STR <i>prm1 prm2 prm3</i> [[CR/LF]</p> <p>Return: UART_STR <i>prm1 prm2 prm3</i> [CR/LF]</p> <p>Parameter: ※ <i>prm1</i> = {poweron,poweroff} //PRM1 is the standard command, newest cmd. ※ <i>prm2</i> = {1,2,3,4,5} //PRM2 is the index of insertting command. ※ <i>prm3</i> = {xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx} //PRM3 is the original command according device guidelines,less than 64 characters.</p> <p>Description: Character uart command edit</p>	<p style="text-align: center;">Example</p> <p>Command: SET UART_STR <i>poweron 1 xxxx</i> [[CR/LF]</p> <p>Return: UART_STR <i>poweron 1 xxxx</i> [[CR/LF]</p> <p>Description: Edid UART command</p>
6	character uart command get	<p style="text-align: center;">Syntax</p> <p>Command: GET UART_STR <i>prm1 prm2</i> [[CR/LF]</p> <p>Return: UART_STR <i>prm1 prm2</i> [CR/LF]</p> <p>Parameter: ※ <i>prm1</i> = {poweron,poweroff} //PRM1 is the standard command, newest cmd. ※ <i>prm2</i> = {1,2,3,4,5,all} //PRM2 is the index of insertting command.</p> <p>Description: Character uart command get</p>	<p style="text-align: center;">Example</p> <p>Command: GET UART_STR <i>poweron 1</i> [[CR/LF]</p> <p>Return: UART_STR <i>poweron 1 xxxx</i> [[CR/LF]</p> <p>Description: Get UART command</p>
7	Hex uart command edit	<p style="text-align: center;">Syntax</p> <p>Command: SET UART_HEX <i>prm1 prm2 hex1 hex2 hex3</i> [[CR/LF]</p> <p>Return: UART_HEX <i>prm1 prm2 hex1 hex2 hex3</i> [CR/LF]</p> <p>Parameter: ※ <i>prm1</i> = {poweron,poweroff} //PRM1 is the standard command, newest cmd. ※ <i>prm2</i> = {1,2,3,4,5} //PRM2 is the index of insertting command. ※ <i>Hex1, hex2</i> = {xx xx xx xx} //hex1, hex2....., is asscii string of hex value. For example, string "12", convent to correct format string is"31 32",less than 64 characters.</p> <p>Description: Hex uart command edit</p>	<p style="text-align: center;">Example</p> <p>Command: SET UART_HEX <i>poweron 1 12 34 56</i> [[CR/LF]</p> <p>Return: UART_HEX <i>poweron 1 12 34 56</i>[[CR/LF]</p> <p>Description: Edid UART command with HEX format</p>
8	Set HDBT Long Reach on/off	<p style="text-align: center;">Syntax</p> <p>Command: SET LR_FN <i>prm1</i> [CR/LF]</p> <p>Return: LR_FN <i>prm1</i> [CR/LF]</p> <p>Parameter: ※ <i>prm1</i> = {on, off};</p> <p>Description: set HDBT long reach on/off,default value is off.</p>	<p style="text-align: center;">Example</p> <p>Command: SET LR_FN <i>on</i> [CR/LF]</p> <p>Return: LR_FN <i>on</i> [CR/LF]</p> <p>Description: set all hdbt output enable long reach mode</p>

9	Get HDBT Long Reach on/off	<p style="text-align: center;">Syntax</p> <p>Command: GET LR_FN [CR/LF]</p> <p>Return: LR_FN <i>prm1</i> [CR/LF]</p> <p>Parameter: ※ <i>prm1</i> = {on, off};</p> <p>Description: get long reach on/off,default value is off.</p>	<p style="text-align: center;">Example</p> <p>Command: GET LR_FN[CR/LF]</p> <p>Return: LR_FN <i>on</i> [CR/LF]</p> <p>Description: get all hdbt output enable long reach mode status</p>
10	Factory reset	<p style="text-align: center;">Syntax</p> <p>Command: RESET [CR/LF]</p> <p>Return: RESET [CR/LF]</p> <p>Parameter:</p> <p>Description: Factory reset</p>	<p style="text-align: center;">Example</p> <p>Command: RESET [CR/LF]</p> <p>Return: RESET [CR/LF]</p> <p>Description: Factory reset</p>
11	Get UART CMD	<p style="text-align: center;">Syntax</p> <p>Command: HELP [CR/LF]</p> <p>Return: <i>prm</i> [CR/LF]</p> <p>Parameter: <i>prm</i> = {SET UART_B <i>prm</i>,GET UART_B,.....}</p> <p>Description: Get all RS232 command</p>	<p style="text-align: center;">Example</p> <p>Command: HELP [CR/LF]</p> <p>Return: SET UART_B <i>prm</i> [CR/LF] GET UART_B [CR/LF] RESET UART_B [CR/LF] SET UART_E <i>prm</i> [CR/LF] GET UART_E [CR/LF] RESET UART_E [CR/LF] ... Description: Get UART CMD</p>
12	Get software version	<p style="text-align: center;">Syntax</p> <p>Command: GET SW_VERSION [CR/LF]</p> <p>Return: <i>prm1</i> [CR]</p> <p>Parameter: <i>prm1</i> = software version info</p> <p>Description: Get software version</p>	<p style="text-align: center;">Example</p> <p>Command: GET SW_VERSION [CR/LF]</p> <p>Return: EX0301_N002_E10 V1.0</p> <p>Description: Get software version</p>
13	Upgrade module	<p style="text-align: center;">Syntax</p> <p>Command: UPG [<i>prm</i>] [CR/LF]</p> <p>Return: UPG [<i>prm</i>] [CR/LF]</p> <p>Parameter: <i>prm</i> = {xxx}</p> <p>Description: Upgrade module</p>	<p style="text-align: center;">Example</p> <p>Command: UPG [CR/LF]</p> <p>Return: UPG [CR/LF]</p> <p>Description: upgrade module</p>

14	Set CEC POWER Delay Time	<p style="text-align: center;">Syntax</p> <p>Command: SET AUTOCEC_D <i>prm</i> [CR/LF]</p> <p>Return: AUTOCEC_D SET <i>prm</i> [CR/LF]</p> <p>Parameter: ※ <i>prm</i> = {1,2,3...} // according to the actual time counter, 1 means 1 minute, 2 means 2 minutes, Default wait time is 2 minutes, Max wait time is 30 minutes.</p> <p>Description: AUTOCEC_D is short for CEC auto Power Delay Timing</p>	<p style="text-align: center;">Example</p> <p>Command: SET AUTOCEC_D 3 [CR/LF]</p> <p>Return: AUTOCEC_D SET 3 [CR/LF]</p> <p>Description: when no active signal to output, 3 minutes later, the unit will auto power off.</p>
15	Get CEC POWER Delay Time Status	<p style="text-align: center;">Syntax</p> <p>Command: GET AUTOCEC_D [CR/LF]</p> <p>Return: AUTOCEC_D GET <i>prm</i> [CR/LF]</p> <p>Parameter: ※ <i>prm</i> = {1,2,3...} // according to the actual time counter, 1 means 1 minute, 2 means 2 minutes, Default wait time is 2 minutes, Max wait time is 30 minutes.</p> <p>Description: AUTOCEC_D is short for CEC auto Power Delay Timing</p>	<p style="text-align: center;">Example</p> <p>Command: GET AUTOCEC_D [CR/LF]</p> <p>Return: AUTOCEC_D GET 3 [CR/LF]</p> <p>Description: Get output auto power delay time, the result is 3 minutes</p>
16	Set Auto CEC mode	<p style="text-align: center;">Syntax</p> <p>Command: SET AUTOCEC_M <i>prm</i> [CR/LF]</p> <p>Return: AUTOCEC_M <i>prm</i> [CR/LF]</p> <p>Parameter: ※ <i>prm</i> = {on,off} // set the auto cec mode, on/off</p> <p>Description: AUTOCEC_M is short for CEC auto mode, default value is on.</p>	<p style="text-align: center;">Example</p> <p>Command: SET AUTOCEC_M off [CR/LF]</p> <p>Return: AUTOCEC_M off [CR/LF]</p> <p>Description: Set the auto CEC mode off.</p>
17	Get Auto CEC on/off	<p style="text-align: center;">Syntax</p> <p>Command: GET AUTOCEC_M [CR/LF]</p> <p>Return: AUTOCEC_M <i>prm</i> [CR/LF]</p> <p>Parameter: ※ <i>prm</i> = {on,off} // get the auto cec mode, on/off;</p> <p>Description: AUTOCEC_M is short for CEC auto mode, default value is on.</p>	<p style="text-align: center;">Example</p> <p>Command: GET AUTOCEC_M [CR/LF]</p> <p>Return: AUTOCEC_M off [CR/LF]</p> <p>Description: The auto CEC mode is off.</p>
18	Set UART POWER Delay Time	<p style="text-align: center;">Syntax</p> <p>Command: SET AUTOUART_D <i>prm</i> [CR/LF]</p> <p>Return: AUTOUART_D SET <i>prm</i> [CR/LF]</p> <p>Parameter: ※ <i>prm</i> = {3,4,5...} // according to the actual time counter, 3 means 3 minute, 4 means 4 minutes, Default wait time is 3 minutes, Max wait time is 60 minutes.</p> <p>Description: AUTOUART_D is short for UART auto Power Delay Timing</p>	<p style="text-align: center;">Example</p> <p>Command: SET AUTOUART_D 3 [CR/LF]</p> <p>Return: AUTOUART_D SET 3 [CR/LF]</p> <p>Description: when no active signal to output, 3 minutes later, the unit will auto power off.</p>

19	Get UART POWER Delay Time Status	<p style="text-align: center;">Syntax</p> <p>Command: GET AUTOUART_D [CR/LF]</p> <p>Return: AUTOUART_D GET <i>prm</i> [CR/LF]</p> <p>Parameter: ※ <i>prm</i> = {3,4,5...},// according to the actual time counter,3 means3 minute ,4 means 4 minutes, Default wait time is 3 minutes,Max wait time is 60 minutes.</p> <p>Description: AUTOUART_D is short for UART auto Power Delay Timing</p>	<p style="text-align: center;">Example</p> <p>Command: GET AUTOUART_D [CR/LF]</p> <p>Return: AUTOUART_D GET 3 [CR/LF]</p> <p>Description: Get output auto power delay time, the result is 3 minutes</p>
20	Set Auto UART mode	<p style="text-align: center;">Syntax</p> <p>Command: SET AUTOUART_M <i>prm</i> [CR/LF]</p> <p>Return: AUTOUART_M <i>prm</i> [CR/LF]</p> <p>Parameter: ※ <i>prm</i> = {on,off}//set the auto UART mode, on/off</p> <p>Description: AUTOUART_M is short for UART auto mode,default value is on.</p>	<p style="text-align: center;">Example</p> <p>Command: SET AUTOUART_M off [CR/LF]</p> <p>Return: AUTOUART_M off [CR/LF]</p> <p>Description: Set the auto UART mode off.</p>
21	Get Auto UART on/off	<p style="text-align: center;">Syntax</p> <p>Command: GET AUTOUART_M [CR/LF]</p> <p>Return: AUTOUART_M <i>prm</i> [CR/LF]</p> <p>Parameter: ※ <i>prm</i> = {on,off}//get the auto UART mode,on/off;</p> <p>Description: AUTOUART_M is short for UART auto mode,default value is on.</p>	<p style="text-align: center;">Example</p> <p>Command: GET AUTOUART_M [CR/LF]</p> <p>Return: AUTOUART_M off [CR/LF]</p> <p>Description: The auto UART mode is off.</p>
22	Switch Input for Output	<p style="text-align: center;">Syntax</p> <p>Command: SET SW <i>in</i> [CR/LF]</p> <p>Return: SW <i>in</i> [CR/LF]</p> <p>Parameter: ※ <i>in</i> = {hdmi1,hdmi2,usbc};</p> <p>Description: ※ SW is short for Swtich ※ Switch one input source for the output sink</p>	<p style="text-align: center;">Example</p> <p>Command: SET SW <i>hdmi1</i> [CR/LF]</p> <p>Return: SW <i>hdmi1</i> [CR/LF]</p> <p>Description: Swtich hdmi1 for the output sink</p>
23	get active input source channel	<p style="text-align: center;">Syntax</p> <p>Command: GET SW[CR/LF]</p> <p>Return: <i>in</i>[CR/LF]</p> <p>Parameter: ※ <i>in</i> = {hdmi1,hdmi2,usbc};</p> <p>Description: ※ SW is short for Swtich ※get active input source channel</p>	<p style="text-align: center;">Example</p> <p>Command: GET SW[CR/LF]</p> <p>Return: <i>hdmi1</i>[CR/LF]</p> <p>Description: Get the input source channel</p>

		Syntax	Example
24	set cec power on/off	<p>Command: SET CEC_PWR prm[CR/LF]</p> <p>Return: CEC_PWR prm[CR/LF]</p> <p>Parameter: ※ prm = {on, off};</p> <p>Description: ※ Set sink power on or off</p>	<p>Command: SET CEC_PWR on[CR/LF]</p> <p>Return: CEC_PWR on[CR/LF]</p> <p>Description: Set sink power on</p>

80 Little Falls Road, Fairfield, NJ 07004 | 800-526-0242 | sales@comprehensiveco.com
